-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112, 1st Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are unclear because there is no description of how a cartridge with an opening and a cartridge without an opening operate at the same time with the probe.

Claim Rejections - 35 USC § 112, 2nd Paragraph

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite. The phrase *"a tape cartridge, wherein the probe retracts at least partially into the spindle when the cartridge does not include an opening and the probe protrudes through an opening in the cartridge as the cartridge is inserted in the tape drive when the cartridge includes the opening"* is unclear. How is it that the cartridge does not have an opening, as set forth in line 6, and then the cartridge has an opening, as set forth in line 8? Is the cartridge being claimed one in the same or two different cartridges?

Art Unit: 3654

Claim 11 is vague and indefinite. Note the rejection of Claim 1. How does the cartridge have an opening in one instance and then all of a sudden, it doesn't have an opening? Is the cartridge being claimed one in the same or two different cartridges?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Christie (U.S. Patent No. 5,881,960).

As best understood and with respect to Claims 1-10 and 16-24, Christie, Figure 4, teaches a storage device comprising: a tape drive; a spindle 126 in the tape drive; a probe 162 positioned in the spindle, wherein the probe engages an opening in the center of a hub in a cartridge as the cartridge is inserted in the tape drive; a hollow stem; a spring 170 in the hollow stem; a stop portion positioned in one end of the hollow stem.

With respect to Claims 11-15, the method described in these claims would inherently result from the use of the tape drive of Christie as advanced above.
